Copilot Is Moving Beyond Assistance

Microsoft is reimagining Copilot for how work actually gets done.

Three capabilities move it forward:

HOME
Work starts here

CODE
Build solutions

AUTOPILOT
Delegate ongoing work

START → BUILD → DELEGATE

DynaSUM | Microsoft Solutions Partner

HOME:
One Place to Get Work Moving

Chat + Cowork + Office, together.

Home brings conversations, delegated work and Microsoft 365 apps closer together—helping teams move from question to completed work with less context switching.

ASK
Ask a question or give a request

ANALYZE
Get insights from your data

CREATE
Build documents, reports or plans

COLLABORATE
Share and work together

WITH WORD, EXCEL AND POWERPOINT APPEARING AS CONNECTED OUTPUTS.

Code + Autopilot: From Ideas to Action

- **Code helps build solutions.**
  Code enables solution-building in a secure environment.

- **Autopilot keeps work moving.**
  Autopilot is designed as a persistent agent that can manage ongoing tasks, follow up and continue working within defined permissions and governance.

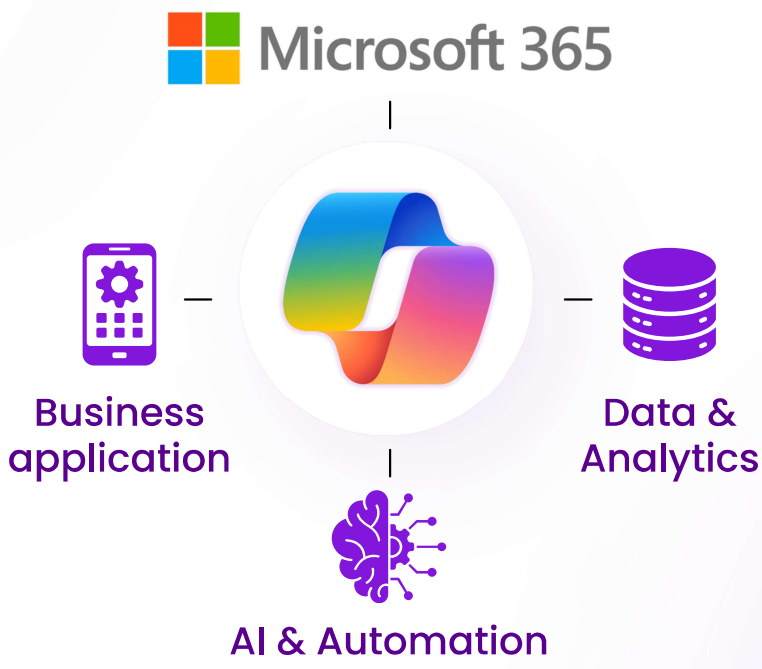
The Bigger Shift for Business

Copilot is becoming part of the work itself.

For leaders, the opportunity is not simply adopting another AI tool.

It is building the data, systems, governance and processes that allow AI to work securely at scale.



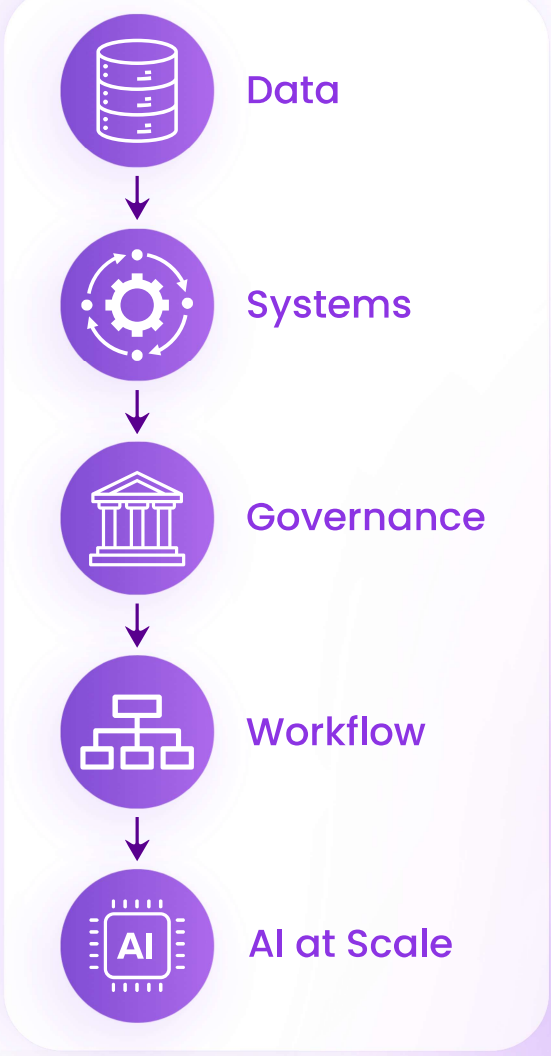
DynaSum helps businesses connect AI, Microsoft platforms, data and business applications for transformation that delivers.

DynaSUM | Microsoft Solutions Partner

DynaSUM Expert POV

AI delivers more value when it is connected to the business.

- Clean, accessible data
- Connected business systems
- Clear governance and permissions
- Defined workflows and outcomes
- Employee adoption and enablement



DynaSUM Expert Tip: Start with one high-impact business process, measure the outcome, and scale from there.
