# Manhattan Foot Specialists is one of New York's Top Rated Podiatry Practices

Manhattan Foot Specialists is a dynamic, modern podiatry practice delivering high-quality, individualized care with multiple convenient locations in Manhattan. Our experienced doctors are best-in-class board-certified podiatrists in NYC (Foot Doctors). Our podiatry clinic offers safe and effective foot care in a compassionate and friendly environment using the newest medical technology. The Doctors of Podiatric Medicine (DPM) serve patients from all over New York, NY, and surrounding neighborhoods at their offices in Midtown, Manhattan, and Upper East Side, New York City.

Our podiatrists are nationally regarded as experts in treating foot and ankle disorders, including bunions, hammertoes, diabetic neuropathy, plantar fasciitis, heel pain, heel spurs, corns, and many other conditions. They are among the top foot specialists that focus on minimally invasive bunion and hammertoe surgery. In addition, they are skilled in the treatment of foot and ankle deformities and sports-related injuries.

# Podiatry Procedures

## HAMMER TOES SURGERY

A hammer toe is a foot deformity where the toe becomes bent at the joint. Hammer toes often cause pain and are associated with corns forming over the toe.

## BUNION SURGERY

A bunion refers to a bump on the base of the big toe joint, also called the metatarsophalangeal (MTP) joint. This bony bump is typically associated with the misalignment of the joint.

## CORN REMOVAL SURGERY

There are two different types of corns: soft and hard. Depending on the type of corn, its location, your Manhattan podiatrist will suggest a procedure to correct it.

## COSMETIC FOOT SURGERY

Bunions, hammer toes and corns are the three most common foot deformities being treated by cosmetic foot surgery.

## MINIMALLY INVASIVE FOOT SURGERY

Recent advances have enabled new “no scar” surgical procedures like minimally invasive bunion surgery and hammer toe surgery which provide comparable and often superior results than traditional surgical methods.

## PLANTAR FASCIITIS SURGERY

Our Podiatrists offer a variety of newest options to treat plantar fasciitis including plantar fasciitis endoscopic surgery.
