

ReachEase Pricing

Lifetime LinkedIn outreach software - one-time licence, plus a small monthly infrastructure fee per connected LinkedIn sender.

Plan	One-Time Licence	Senders	Workspaces	Per Sender / Month
Trial	\$9 (30 days, does not renew)	1	1	-
Ignite	\$299	3	1	\$12
Momentum	\$499	5	2	\$10
Velocity	\$999	10	4	\$9
Empire	\$1,499	25	10	\$8

How pricing works

The software licence is a one-time payment. The only recurring cost is infrastructure for each connected LinkedIn sender, billed monthly at the rate shown for that plan. There is no subscription for the software itself.

What's included

- Connect multiple LinkedIn accounts (senders); a balancer spreads outreach across them within each account's own limits
- Import leads from Sales Navigator, LinkedIn search, CSV/XLSX, post engagement, groups, or event attendees
- Visual sequence builder with campaigns that branch on accept, reply, or no response
- One shared inbox (Unibox) for every reply from every connected account
- Telegram alerts with AI-drafted replies, and a mobile Unibox (Momentum plan and above)
- Claude MCP support (early access, owner-level key)
- Built-in safety: daily sending limits, account warm-up, working-hours enforcement, reply kill-switch

Ignite does not include Telegram alerts or the mobile Unibox; these are available on Momentum and above. LinkedIn allows approximately 100 invitations per account per week on every plan - this is LinkedIn's own limit, not a ReachEase restriction, which is why adding senders (not sending faster) is how outreach scales.

ReachEase is an independent product and is not affiliated with, endorsed by, or sponsored by LinkedIn.
